50 years of growth

Sofidel is the second largest group in Europe and the sixth in the world for production of tissue paper (for hygienic and domestic use). With over half a century of history and experience, Sofidel is now a consolidated reality at an international level. The Group companies, present in Europe and in the United States, are constantly committed to the integration of sustainability and innovation in their everyday activities.

OUR COMMITMENT

GOALS ACHIEVED IN 2017

7,1 lt

LITERS OF WATER USED ON AVERAGE
PER KG OF PAPER PRODUCED

CLIMATE SAVERS: GOALS TO ACHIEVE IN 2020

-23%

Of direct CO₂
emissions comparing
to 2009, per every ton
of paper produced

-13%

Of indirect CO₂
emissions comparing
to 2010, per every ton
of paper produced

8%

Use of renewable
energy sources on the
quantity of fuels
consumed annually

* supplied by independent third parties with forest certification schemes

The force of hygiene

The use of single-use products, helping to reduce the risk of transmission of bacteria, is the most effective hygiene tool*. Washing and drying your hands is a small daily gesture, but it is a great contribution to health and life. For this reason, Papernet, the Sofidel Group brand in the Away-From-Home sector, promotes the culture of hygiene, with the idea that it is the foundation of a life of superior quality.

** Indicated by the World Health Organization and by a study conducted by the research group of the University of Westminster.*

Beyond performance

Papernet offers a wide range of products that stand out in the market for their high effectiveness. Years of technological research and development make our products with high added value exclusive. The Away-From-Home assortment is sustainable, from procurement, to production, to final use. In particular, our Ready Table range, dedicated to the foodservice sector, is made of paper of highest quality, to guarantee our customers useful, performing, but also beautiful and versatile products.

Our offer for a growing market

Foodservice is a rapidly expanding commercial sector, thanks to global phenomena such as the increase in consumption of meals Away From Home, and the increase in tourist flows. The sector specifically includes all the activities that involve a traditional catering service, such as bars, restaurants and fast foods, but also canteen services for companies, hospitals and large communities.

VERSATILE AND CHEERFUL, SUITABLE FOR EVERY NEED

The **Ready Table** range of products enhances and personalizes any environment. Both napkins and the practical table cloth, are all made with **completely recyclable paper in pure cellulose from certified or controlled sources**.

RESPECTS
THE ENVIRONMENT

SAVES TIME

COLORS
YOUR AMBIENCE

REDUCES
THE COST IN USE

Restaurants & Cafés

The new range of **Ready Table** interfolded napkins and dispensers adapts perfectly to the **small dimensions of a coffee table, thanks to the small size**. In addition, the variants of napkins and colors of the dispenser easily match the style and furnishings chosen for the premises.

Fast foods

The new **Ready Table** range is also perfect for fast foods: even if they are high traffic areas, **the paper consumption is massively reduced, thanks to the interfolded dispensing system**. The dispensers are easy to open and refill at any time, even with just one hand, to always ensure excellent service.

Self services

Speed and efficiency: this is why the large **Ready Table** dispenser is ideal for the self service counter. Paper consumption is reduced thanks to the interfolded dispensing system, and the service is always excellent. **The large Ready Table dispenser can contain a huge amount of napkins,** reducing the risk of empty dispensers and time and cost of refilling.

Canteens

The **Ready Table** dispensing system, in its most basic version, is also designed for business environments, where there is a need for a **simple and economic solution, but with a fresh and functional design.**

A PERFECT OFFER FOR CATERING AND HOSPITALITY

A large napkin for a small place

The technique used for folding produces small napkins which, once opened, become twice as large.

Reduced paper consumption

Comparing the distribution of single napkins with the interfolded napkins dispenser, there is a noticeable drop in consumption. This translates into both a tangible reduction in costs and an improvement in environmental sustainability.

* Comparison between Papernet **416184** and Papernet best seller **415237**

READY TABLE DISPENSING SYSTEMS

They are suitable for every situation: starting with the need of small dimensions to optimize the space on a table, to containing many services in one large dispenser, convenient to use and easily accessible.

Dishwasher safe

The smallest

1 Functional

The dispenser design was driven by the need to reduce its dimensions, making it ideal for small, high-traffic locations. The rounded shape enables an easy exit of the napkin, reducing the risk of breaking it.

2 Practical

The dispenser is easy to check and refill at any time, even with just one hand, and it is completely dishwasher safe.

3 Basic

The constant focus on reducing the cost in use has allowed us to create an effective and efficient solution, but at the same time simple.

**417194**

Base 17.8 cm
Height 12.5 cm
Depth 11.8 cm

Antibacterial

Dishwasher safe

Anti-drop

1 Optimized

Napkins are distributed individually through a slit with a rounded profile: this reduces the friction, avoiding tears or occlusions inside the dispenser.

2 Safe

The dispenser is entirely made of antibacterial plastic, and the lid is slightly inclined, to facilitate the sliding out of liquids that could accidentally fall on the dispenser.

3 Easy

Thanks to its central button, it is possible to open the dispenser even with just one hand, and it is completely dishwasher safe.

4 Hermetic

Thanks to the innovative design and the double internal profile of the lid, the infiltration of liquids and food residues is limited, keeping the napkins clean and protected.

5 Monitorable

The dispenser is provided with transparent windows to comfortably control the level of the paper, without having to open the lid every time.

6 Customized

To complete our Ready Table offer, now there is the possibility of inserting your own communication both on the dispenser and on the napkins.

Trendy colors and design

Our new Ready Table dispensers are available in many different colors, to easily integrate in any environment.

READY TABLE

A WIDE RANGE FROM CERTIFIED SOURCES

Scientific sources

The **World Health Organization** and the prestigious **University of Westminster** recommend the use of paper hand towels, given the substantial reduction of bacteria on hands.

Papernet products awards

The jury of the 2015 **PPI Awards** selected **Papernet Bio Tech**, the biologically active toilet tissue, as the “**Innovative Product of the Year**”.

Dissolve Tech is the winner of the 2016 **Sanitary Maintenance Distributor Choice Award**. The Distributor Choice Award program rewards the cleaning and janitorial products more useful and innovative of the year.

Papernet products certifications

Bio Tech and **Freshen Tech** are the two products officially tested for the dermatological control, by the prestigious lab **Chelab Silliker**, part of the **Mérieux NutriSciences Corporation**.

In 2013 **Bio Tech** received the certification, by the prestigious **SGS Institut Fresenius, in Taunusstein (DE)**, concerning the beneficial enzymatic activity of BATP spores. SGS is the leading German company for the inspection, control, test and certification.

The **Centre Technique du Papier in Grenoble**, in 2014, demonstrated the dissolvability of Dissolve Tech paper after 3 minutes of contact with water. The Centre Technique du Papier in Grenoble is a research and development company that provides scientific support to the paper and tissue industry.

Sofidel achieved an important goal: the 100% of virgin fibers purchased by the Group comes from certified or controlled sources. For this reason, we decided to communicate this result adding an icon on the packs of our products made with virgin fibres.

**Forest
Stewardship
Council®**

It is the certification system used for forests, wood and derived products: it guarantees that the products come from forests managed according to strict environmental, social and economic standards. The Forest Stewardship Council is the non-profit organization born in Mexico in 1994 and transferred to Bonn in 2003, which issues the certification necessary to use the label on the basis of the checks carried out on the forests where the wood is extracted, and in the course of all subsequent production steps. Even if the numbers are continuously increasing, to get an idea of the vastness of the FSC label, we should consider that, currently, about 72 million hectares are certified in the world in over 790 locations; this means 13,000 lines of certified products, for a global market of over 5 billions US\$.

<http://ic.fsc.org/en>

**EU Ecolabel
or EU Flower**

Ecolabel is the voluntary label (type III) created by the European commission in 1992, as a quality label assigned respecting specific ecological criteria. It indicates that the product guarantees a reduced environmental impact in every phase of its life cycle, considering the environmental aspects related to its production: the quality of the air, water and soil, waste production, consumption of resources and energy, noise pollution, biodiversity protection. According to the principle of shared environmental management, the criteria adopted by the commission are proposed by an Ecological Label Committee (CUEME), participated by Industry and SMEs, consumer associations, environmental associations. The attention given to the whole life cycle allows to reduce the global environmental impact. Through the Ecolabel, the consumer has reliable and scientifically founded guarantees both in relation to the environmental impact and to the product performance standards.

<http://ec.europa.eu/environment/ecolabel>

**The Blue
Angel**

The Blue Angel products meet a set of criteria taking into account the environment and health aspects. The purchase of a product labeled Blue Angel is a guarantee of good products with lower environmental impact, and a greater protection of health, than many other products that serve the same purpose. The main criteria for tissue paper are as follows: raw materials must be made of 100% recycled paper; Blue Angel suggests that a product made from 100% recycled paper saves the raw material needed for the production of virgin fiber paper. This action not only contributes to a reduction in the volume of waste, but also helps to preserve wood resources.
